# Keys To The Trematoda (Cabi)

## Synopsis

This is the third of three volumes of Keys to the Trematoda, a series on the systematics and identification of the Class Trematoda. It covers five superfamilies with the Order Plagiorchiida and the family Didymozoidae, with the keys for their identification at the family, subfamily and generic levels. It also includes a key to all digenetic superfamilies, including those treated in detail in volumes one and two.

## Book Information

Series: Cabi

Hardcover: 848 pages

Publisher: CABI; First edition (October 28, 2008)

Language: English

ISBN-10: 0851995888

ISBN-13: 978-0851995885

Product Dimensions: 9.7 x 1.8 x 6.8 inches

Shipping Weight: 4.4 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #2,057,213 in Books (See Top 100 in Books) #35 in Books > Medical Books > Veterinary Medicine > Parasitology #64 in Books > Medical Books > Pharmacology > For Veterinarians #82 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Parasitology

## Customer Reviews

"The editors and additional contributors must be congratulated on completing this project that will provide an enduring source of information for digenetic taxonomists wherever they may be. Librarians can order this volume, and the earlier volumes, in the certain knowledge that it will not be replaced or superseded in the foreseeable future." (Dr. Alan Pike, University of Aberdeen, UK)

A. Jones, All at The Natural History Museum, London.

I am a Korean, major in Parasitology. Among the fields of parasitology, I have interested in the intestinal trematode, especially crab-mediated microphallids. However, to study microphallid is very difficult for me because there have been few books on this subject. I wrote the articles on microphallids based on the old articles written in 1950s. Hence, this book is a sweet rain for

me.Thank you for the authors and publishers.
