Textbook Of Neonatal Resuscitation

Synopsis

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate. Two new chapters added covering post-resuscitation care and preparing for resuscitation. 140+ new full-color photographs replacing most line drawings.

5 Star Review! "An essential book for every person who regularly cares for a neonate who requires resuscitation." - Doody's Book Review 2016

Associate editor: Jeanette Zaichkin, RN, MN, NNP-BC Jeanette Zaichkin has been a neonatal nurse for more than 30 years. She graduated from Pacific Lutheran University in Tacoma, WA, and received her master's degree from the University of Washington. Jeanette has worked as a staff nurse, clinical nurse specialist, manager, and neonatal outreach coordinator in a variety of settings, including community hospitals and major medical centers. She has numerous publications

and has served as a consultant and editor for the American Academy of Pediatrics Neonatal Resuscitation Program since 1998. Jeanette leads Positive Pressure, her business enterprise that provides consultation and program development for neonatal resuscitation, simulation and debriefing, and instructor development. Â

This is an easy to read comprehensive updated review of the care of distressed neonates. Key points and lesson reviews at the end of each chapter help to reinforce topics. Some topics are repeated throughout the book to help retention. Multiple case studies. This book makes it easy to pass the NRP 7th edition exam and is an excellent companion to the baby E-simulation learning tool cases on the AAP.org website. The book makes you a better caregiver for sure.

I mean, I passed. I guess it did the job! I love the online skills simulations, they really allow me to build muscle memory and quick decision making about things I hope never to encounter enough times to really get to "practice:..

Glad the illustrations were updated. I preferred the end of chapter summaries in the previous version.

I love my job and this is the only book for NRP certification.

Product packaged well. Product intact as described

Book was great easy to underline and prepare for testing

The book arrived in perfect condition. I bought it because it was required for work. That is the only reason.

Book was written clearly with review of material at end of chapters. I did not like the Sim events because I had difficulty understanding the way to initiate the event and how to move through the content correctly. It wud have been good to see how the entire event should have gone prior to my attempting to replicate it.
