Haze (The Telorex Pact Book 2)

Synopsis

Warrior Haze doesn't have time for his new matched mate Vi, no matter what his DNA says. Sure, he wants her. Has to have her. But his mission comes before everything, even when it puts his feisty little mate at risk. Vi is no man's toy. She's done with losers. Been there, done that, burned the t-shirt. And a new life with a sexy alien warrior is just what she needs. But instead of a bride, Haze needs an undercover plaything. When Vi promises Haze that she'll kick his ass if she gets sent to the auction block — him, the greatest fighter the Mahdfel have ever seen — it sends an excited zip through him. He's doing his best to play it cool, but she's distracting him from the mission. And the harder they fight the attraction, the harder it is not to succumb...

I enjoyed reading this book, it has a good storyline. Can't wait for more from this author.

He Looks So Good On My Couch.....VioletÃ Â Â'Ã Â Â' finally kicks out her handsome but lazy boyfriend, Rafe, but she fails to realize she is now single and available for the Mahdfel's human brideÃ Â Â program. Oops.No sooner does she kick Rafe out, the government soldiers are

knocking at her door to escort her to the DNA matching clinic and departure point. Before she even understands what's going on, she is teleported onto the Mahdfel ship, Xeo Tarlith, to meet her mate, Haze. The ship's weapons expert, Oz, and the other warriors are in an asteroid field mining a mineral needed for the health of the remaining women of their race. They are also near Suhlik controlled space. Violet thinks Haze is pretty hot, with a huge sexy ripped body with huge manly parts to match! He's the best fighter on the ship, and the most aggressive of the Mahdfel warriors. Haze just needs to learn to talk to Violet. Nature will take its own course if he can keep his foot out of his mouth! YEHAW! Ride Em Bareback, Cowgirl! The xxx scenes are well written and flow with the story. I Liked this book better than some of the others in this series, but they are all written by different authors.

Haze is Phoebe Fawkes second entry in the Telorex Pact series, and unfortunately it suffers from the infamous "sophomore slump." The Telorex Pact, which is the over-arching series plot, is poorly explained and remains minimally developed, and the connection to the first novel, Oz, is tenuous at best. This novel attempts to be another character-driven alien romance, but the character of Haze talks like a 20-something 21st century urban American, right down to the slang. His perpetual cockiness only adds to that impression; it's immature braggadocio as opposed to alpha warrior confidence. His spycraft leaves no doubt: this guy's a kick-butt wanna-be. Vi as a strong, feisty and intelligent woman is a likable character, but it is not at all believable that she could fall for Haze, or that anyone as shallow and cartoonish as he could interest a woman like her. The plot meanders from one foot-in-mouth misadventure to the next, blurring the story's focus and taxing the reader's patience. In that sense, the title at least is apt.

I love all of the Mahdfel books by different authors. This is the second book in series by Phoebe. I liked Haze from the first book. He is so strong and willing to do what needs to be done for his planet and for his mate. The crew is searching for the mineral that they need for medicine for the mothers and daughters of their home world. But they run into an asteroid and have to go to a back water planet to get parts. This story was full of adventure with Haze and his mate Vi on the slave planet.

We also learn a small fact about the virus that is ravaging their home planet. Read book one Oz first for the full impact.

If you like an interesting sci-fi romance with a good story line then this is written for you. Vi is a human strong willed woman who is matched with an alien lizard type creature from another planet outside our solar system. She decides to make the best of things and she does. Even going as far as falling in love with her green tailed lizard called Haze. They work together to free slaves and save friends while completing a mission from the captain of their space ship Xeo..

The storyline is about women who are sent to be mates to the aliens as a part of a deal in return for the alien warriors protect earth from other evil aliens. Matched through a DNA test, the women really don't have much of a choice. Haze and Violet appear to be a real mismatch but some exciting and dangerous adventures prove everyone wrong. I recommend this story to anyone who likes adventures, slavers, and love.

Ooh, the opening scene where she kicks her loser boyfriend to the curb felt really good. I think we all know the feeling of having someone stick around sort of because it's convenient. When they fell in love, OMG the steamy scenes made my heart melt because it was just really nice. I can't explain it better than that - you need to read the book.

I enjoy these stories and look forward to the next one. The alien characters are fun and have interesting personalities. The humans may acclimate a little too fast to being in space, but being shorter books, I understand the necessity for that. Read them! Start with Oz's book- I loved him. Haze is a fun laid back guy when he's not rescuing slaves that is.
