Deputy Assistant Chief John Norman is a veteran of more than 40 years in the fire service, with a wide range of experience. He has fought fires in rural, suburban, and urban settings. Now retired, Norman was Chief of Special Operations with the New York Fire Department from 2001 to 2007. Until that date, as a Battalion Chief, he had been assigned to the 16th Battalion in Harlem. In the days after the collapse of the Twin Towers, Norman was designated as the Search and Rescue manager for the World Trade Center site. He operated in that position as a member of the Incident Commanders General Staff for two months before assuming his assignment as the Chief in Charge of the Special Operations Command on a full-time basis. Chief Norman is also the author of Fire Department Special Operations.

I agree with one of the other reviewers about the study guide being difficult to use. Many of the answers are wrong in the answer key. Many, many of the questions and answer choices are written badly. The only helpfulness I found in it was it made me look deep in the actual textbook for the answers and in doing so, could commit the details to memory. But, it is frustrating and a little exhausting picking through the question and answer choice wording. Also, it becomes tiresome looking up an answer to a question to make sure you answered it correctly because the answer key is wrong...All that being said, I am glad I used it because it forced me to get more familiar with the textbook information.

Holy crap....I understand the book, the concepts, etc, but this study guide is ridiculous, half the questions have multiple answers, or just not the right answer. This book has been detrimental to my learning of the material. Do not use this to study for a test, if they ever used these questions on a promotional exam it would only result in a lawsuit.

Over 30 hours of audio. I rotate the CD's though the stereo in my truck, listen while driving. Keeps me on my game.

This book is chock full of interesting anecdotes and techniques. Some are very unique scenarios to New York and will not help you at all in small town, USA. It is still very interesting to see how other places do things. I think it's best read outside of promotion as just a student of the fire service.

Having the audio book is like seeing a movie, before you read the book.

This book has helped greatly in preparing for a promotional test. I would recommend this book to others who are preparing for a test.

This book is great. A must have

really useful
