Book by Jenkewitz-Meytras, Christine

This climbing guide book was the first really good guide to Tahoe-area rock climbing, and it is still the one I turn to for the classic routes. It doesn't have the newly-developed areas, but to this day is possibly the best guide book for beginner and intermediate climber. It is written in the topo genre, with diagrammatic descriptions of the technical problems at each part of the major climbs. It makes a wonderful companion volume to the newer-style guide books that just show a path on a photograph, and tend to leave out important information to the novice on things like terrifying run-outs on easier climbs, because the books were written by experts who are dismissive about climbers of modest ability. I wouldn't want to be without this guidebook, which is why I bought another one from when I couldn't find my original copy.
