## Synopsis

Gift your child endlessly rewarding skills they can cherish lifelong. This book has more than 3100 addition facts for daily practice by students. Each page has 2 different sets consisting of 18 problems each. It is recommended for students to attempt 1 set daily for consistent practice. Book starts with addition strategies to help students grasp basic concepts and get started. Once students start gaining confidence in individual facts, they can review their knowledge by solving mixed facts. Book can be used to track practice time for each set. Date and time can be recorded at top of each page. Answer to each problem is given at the end of the book. Addition facts table is available at the end of the problems for easy reference. Knowing addition facts is helpful not only in academics; we frequently use addition in our daily lives too. Just like learning to walk before you can run, learning addition and familiarizing yourself with numbers are building blocks for other math topics taught in school - such as division, long multiplication, fractions and algebra. Mastering the basic math facts develops automaticity in kids. Automaticity is the ability to do things without occupying the mind with the low level details that are required; this is usually the result of consistent learning, repetition, and practice. For instance, an experienced cyclist does not have to concentrate on turning the pedals, balancing, and holding on to the handlebars. Instead, those processes are automatic and the cyclist can concentrate on watching the road, the traffic, and other surroundings. Until students have developed sufficient sensory-cognitive tools supporting access to symbolic memory, they will not be able to image, store or retrieve all of the basic facts with automaticity. Therefore, students need a comprehensive, developmental, and multi-sensory structured system for developing automaticity with the facts.

I bought other book by this author "Multiplication Worksheets" and was impressed and tried addition too. This is a high quality practice sheets helping kid learn progressively and consistently.

All three books, subtraction, addition and multiplication were great tools I used with the grandkids over the summer.

Very good one for daily practice for my first grader!

Smile! Math practice-home work is now made easy! Thank you!

Good to use as a daily review in the classroom.

Great for 1st grade preparation. My son does 2 pages a day.
