Customer Reviews

Book was in good condition (physically) and the contents are appropriate for 10th graders although I would like to update revisions to keep up with the current inventions....

The book is so clean and excellent.

What the school wanted.

I bought this book because I was having trouble with my college chemistry class. It helped me out a lot. The layout is great, all the important stuff is in bold letters or in boxes that sum up everything you need to know, short and sweet. Definitely would recommend to others to buy.

Great to have affordable options to purchase copy of textbook for home use...they are so heavy to carry back and forth from school. Book condition was as advertised.

My 10th grade daughter lost her Chem book. Not wanting to spend the \$70 replacement fee, I found this one online used for \$9.99 (\$6 price plus \$3.99 shipping). It is in better shape than the one she

lost. It arrived within a week. Great deal.

We have purchased many books for my daughter and have paid as much for a dilapidated book as for a new book. I expected this book to be put together with duct tape. It was not, it was in such great shape I wanted to contact the seller and make sure she did not send the incorrect book. Thanks to the seller my daughter has a book that doesn't look like someone's dog chewed it.

Never buy a book from this seller. I ordered a book 30 days ago and it has never shipped, let alone arrived. I have emailed the seller three times, with no response. I needed the book for a school class, so timely delivery was important to me. Of course, there has been no delivery at all. I have now entered a claim against the seller through . I wonder whether the seller has gone out of business.
