Language: English

ISBN-10: 1930044003

ISBN-13: 978-1930044005

Product Dimensions: 0.2 x 8.8 x 11 inches

Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 97 customer reviews

Best Sellers Rank: #45,909 in Books (See Top 100 in Books) #8 in Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Heating, Ventilation & Air Conditioning #111 in Books > Engineering & Transportation > Engineering > Construction #156 in Books > Engineering & Transportation > Engineering > Electrical & Electronics

Customer Reviews

Section 608 of the Federal Clean Air Act requires that all persons who maintain, service, repair or dispose of appliances that contain regulated refrigerants be certified in proper refrigerant handling techniques. The EPA has also placed a sales restriction on refrigerants, limiting the sale of regulated refrigerants to certified technicians only. Technicians who violate the Clean Air Act provisions by be fined, lose their certification, and may be required to appear in Federal court.

Informative without frills, BUT for a newbie who is not going to school for HVAC or refrigeration training there are several things missing. If you don't know what classifications the various refrigerants this book will not tell you. The description of the refrigerant cycle is accurate but not detailed enough to get a raw novice through the test without further study. If you are taking classes this book is what you want - if R22, HCFC or any of the other refrigerant names or classifications is new to you, look for something with a little fuller explanation.

Book needs more information, this is a good quick study guide. Be sure to practice all the questions

when you good epa 608 practice test.

There is a lot of information here, it looks to be complete. It is only like eight pages, not a full sized book, but probably enough to help you through the test.

I am better off using free online references which are more comprehensive and relevant to the certification test. Save your money. Don't buy.

I passed the EPA certification using this book, quizlet flash cards (which you can make for free online) and the ESCO practice exams on their website. I can say that this book helped me but there were some questions on the actual exam that the book did not cover. I don't think it's fair but I still passed. You don't have much choice because they have the actual exam. I only paid \$25 for the test because I'm a student at a community college, I was told the test runs for \$500 or something and that's just nuts to me.

I ordered this despite the study guide our teacher gave us. Yes it is older but it less pages with majority of the same stuff as the new one and its less simple. My epa exam was 100 questions and i passed with 96 right and only got four wrong. Easy simple book

This manual was pretty invaluable for me. The material is exactly what is on the test. Read this everyday for about 2 weeks and do free practice tests that you find online...you'll pass no problem.

Not quite what I thought however it was useful and I have no regrets.
