Customer Reviews

I have used Saxon math for all my homeschooled children from K-8th because it is a steady incremental approach to learning math. This has all the tests needed for this level, plus copyable "work pages" they can use for each test. Very helpful. Test are given every 5 lessons (except for the first test which comes after lesson 10).

Saxon is an excellent way to teach your child math even if your not so great at it yourself, specially the step by step explanations. As far as pricing...yes this can be quit expensive, do your homework and look around!! I got the text book and solutions manual on ebay (brand new) for \$25.00 and then ordered this tests and worksheets through for \$22.00. So i dont think \$47.00 for all three was bad at all!!!

I've been homeschooling for three years, and Saxon is the best for my son. The problem set is a bit much, so we go through the lesson and then do the practice set only. I like how the tests review back through the lessons you've studied. If your child doesn't retain the information as well, the

problem set is a good daily review.

It was great. Fast delivery. Great item! always in love with the service

Great for homeschooling my 8 th grader this year. Was clueless about what program to use. came highly recommended and it is working super

Just what I wanted.

I have always enjoyed the saxon series and this has been no different than my past experiences. I would suggest using the test and worksheets.

We love Saxon Math for home schooling!!!!!!!!!!!!!!!!!!!!!! This is the second year we are using it and would highly recommend it
