European Book

I have two of these Black Cat readers for learning German -- the Mozart book and the Einstein book. I have the editions that come with CD. The books are great! The quality is wonderful. I got the books at the original price, which I thought was quite reasonable for such good materials with audio. The voice talent is also excellent, and the recordings are nice and clear. There is only one problem, and for me it is a big problem -- both the Mozart CD and the Einstein CD are very poor quality. Although both CDs start out OK, toward the end the sound is distorted and the CD even skips on both CDs. The problem is not with my equipment. I have tried the CDs on a number of different players, and I also tried ripping my own mp3s from the CDs. The mp3 files also had the same sound problems. Has anyone else had this problem with bad CDs? I've written to the company to see if I can get replacement audio, but I've yet to hear back. If the CD audio were OK, I'd definitely give this book with CD 5 stars.
