A Bevy Of Blue: Picture Book For Dementia Patients (L2) (Volume 2)

Synopsis

A Bevy of Blue: Picture Book for Dementia Patients, Seniors & Others (Level 2 Book). This is one of a series of picture books for dementia patients (or those with Alzheimer's), adults and seniors that have trouble reading. If your loved one is overwhelmed by 'normal' books but spry enough to feel offended with books labeled as dementia books or by being given a children's book, this is your answer. This book helps those who have a hard time reading in several ways: Each book in this series is themed around one color. A Bevy of Blue has photos featuring beautiful blue elements from around the world. From charming blue mailboxes in Italy to exquisite blue homes in the Yucatan; from the adorable Blue-footed Booby bird to sparkling blue ice caves in Nepal. Those with dementia, Alzheimer's or senior reading struggles can find joy in 'reading' a book that does not need for them to follow a story. *The book is formatted to look like a 'real' book. It is designed for adults, without any child-like wording or features. This allows your loved one to feel proud to own it as part of their book collection. * Neither the title nor any text on or in the book states that the book is for dementia or any type of memory/cognitive problems. It is truly concealed so that the reader is not insulted. * This is a nice, good-sized 8.5 x 8.5 square book with 98 pages that is large enough to really be able to take in the photos, without feeling 'huge'. The soft cover makes it easy to hold. This is not a heavy hard-cover, nor is it a 'board book' that seniors can find condescending. *The short picture descriptions are in large 16 px text. There are 1 to 3 short sentences per picture. Within each picture description, the word 'blue' appears 1 time, to keep the reader on track. * Each photo (and short text) is only located on the right page of this book. The reader can focus on one image at a time without distraction. Please note: This is a Level 2 book, which primarily focuses on being a book of photos, along with short accompanying text. If you are looking for purely a picture book without any text at all, please look to the Level 1 books; for 'easy-read' short stories, please look to Level 3 books.

Customer Reviews

"It's obvious that not only great care, but also love, was put into the creation of these picture books for older adults. Perfectly chosen photos, bright colors, a much needed niche." - Faye Dunningham

A BEVY OF BLUE is a collection of amazing photos - with accompanying text - that have one thing in common: the color blue! You may be surprised to find out how many variations of blue exist in the world. From lovely blue lionfish to stunning blue buildings in Morocco, this book brings the color blue to life. If you are an adult bookworm who enjoys exquisite photos, this book is for you! It is hoped that you find this book worthy of adding to your collection. Enjoy your read!

This book is really nice. It has lots of photos of blue themed images. It's perfect for relaxing and drawing the mind to peaceful blue colored things. It has been very good for my family members who are challenged, as well as the rest of us for the enjoyment factor. We found that if our loved one gets tired going through the book since it a nice long length, you can have them come back to the rest of it and they enjoy it just as as much as the first half. A soft soundtrack in the background just adds even more to this book's enjoyment factor.

Bought the Blue and Pink book, my mother stays engaged looking at the pictures, her dementia is pretty advanced but she can still read and these books prompt her to talk about the pictures. Would highly recommend for someone with dementia. So many books I have looked at say righ on the cover "for memory loss" or something similar...not a good idea for a person who has memory loss and can still read!

This book is very fun to look at, with detailed photographs on every page. The blues are beautiful and the sentences are short and sweet descriptions of the pictures that tell you what kind of bird it is, where the beach is located, ect. I gifted this to my nana who is still reading at a higher level but

this was well received by her!

The book is filled with beautiful pictures. I was hoping for larger pictures because my husband has trouble seeing.

Nice to look at and read.
