## Customer Reviews

Hi my name is Nick and I bought this for part of my homeschool that I do for my grandchildren. I am there science and nature teacher. I have a degree as a nurse and buy all sorts of products. Today I am reviewing Ultimate Predators In The Wild. This is about 50 pages of content, mainly pictures though. It is perfect for about the five to seven year old range so I really could not use it much, I looked it over first then I let the children see it. They were 8 and 11 and it didn't do much at all for the 11 year old. It is a good little eBook though with some great graphics. You can see some

of the pictures I posted of the images. It does have some nice paragraphs about the animals. It has cheetahs, lions, bears, sea life and a wide range of animals, even spiders are in it. I wish it had more text though. Like I said the majority of it is graphics and more text would have been good for teaching, yes I can put my own in there but it is not the same thing. I really can not give it a five but will give it a four for a kindle eBook. I do not know if the actual book is any better than this one. I would hope it would be. I am given free items or at a reduced cost for my reviews, I do not always give a five star but I always try to give an honest review. I hope this helps you decide. Thank you

I got to receive this for free in exchange for an honest review. I read this to my kids tonight before bed. When I say I read it, I read snippets, a lot of the content would have given them nightmares. Maybe not the big kids so much, but as in the other book, sharks bite you and then leave you to bleed out in the water (REALLY)! I would say discretion is key here too. The reason this book got an ok and not the same rating as the other one is because when I read this one I realized that not only did they use the same pictures for some of the animals, but they even used the same wording. It was basically same book with a few different animals. If I was a paying customer who had just bought both of them at full price only to realize they had a lot of the same content I would have been disappointed, they asked me for an honest review and that's what they are getting. I would have been unhappy paying for two books with the same pictures and wording for some of the animals. That being said, the animals that were not duplicated and even the ones that were. The pictures were incredible. This company uses quality pictures in their eBooks. I mean just beautiful. They got the 3 stars for pictures, and good facts. They lost the 2 stars because this is listed as a child's book and it would scare most kids I know, and they duplicated stuff which annoyed me. I got this for free in exchange for an honest review. My opinions are my own.

This book, in my opinion, is most suitable for older children and adults. Many of these animals are quite scary (even for adults!) and if the book were a video I'd have to label it "PG." I do think that it could be better organized, with explanations of some of the vocabulary such as "predator" and "prey." In addition, I think it would be easier to read if the animals were introduced in some kind of order (e.g. by continent, type of animal, size of animal, or something similar) rather than so randomly. Also, it would be more effective if the pictures were placed next to the text so there wouldn't be any confusion as to which creature the text is describing. The photographs are simply stunning, and the text very well done and informative. For younger children, my suggestion is to

paraphrase the main points but not go into detail about how the predators obtain their prey! Over all, I think the book is excellent and well-done, and quite suitable for most readers. There is a lot of information to absorb and one will come away with a much better understanding of these fascinating creatures. Disclosure: I received this ebook free or at a reduced cost in exchange for my personal and honest opinion.

I have two sons, one is 8 and the other is 6. They (as most kids do) Love animals! They love this book! They love to learn about animals and the hows and whys they do what they do. The pictures in this book are amazing, bold and beautiful colors. And my boys love reading this book! All in I have to give it 2 thumbs up! Thank you for this! I was given the opportunity to receive an Ultimate Predators In The Wild: for a discount in exchange for my honest and unbiased review. This should in no way discredit my review, as I take great pride in helping others through my reviews. I myself always look to reviews when I go to make a purchase, and so I would never want to steer anyone in the wrong direction. Please, if you found my review helpful in the slightest, Hit YES below to let me know I'm writing reviews you like.

This is a very good book. I would most certainly recommend this book for any child (or even adult) who are wanting a better understanding of all of the top predators in the animal kingdom. Fantastic crystal clear pictures that gives the reader a great look to fact. These pictures showed the animals in their natural habitat and enabled the reader to envision these animals' homes and environments. The layout and backdrop of the facts was well-designed and made the facts very easy to read. Kids love this book as it gives them something a little bit frightening, and gives them all a better idea of why they are necessary in the animal world. The format of the book was quite concerning and made it very hard to read. There would be a picture, and then a fact correlating with that first picture, then another fact not related to that first picture, then the picture that correlates with second fact. It makes it a little confusing to read. To be fair, I have the kindle and the hard copy might have the fact and picture on correlating pages so you do not have to turn the page to see the corresponding fact/picture. There are also some minor grammatical errors that should have easily been caught when the editor was reviewing the book. Also, as an animal nut trying to show how great animals are to his kids, there could have more truthful facts to pick for certain animals.
