Customer Reviews

This high interest informational series offers young readers a full picture into the lives of familiar polar animals. Each page features a vibrant photograph and two descriptive sentences. Information about what the animals eat, where they live, how they --Library Media Connection

Katie Marsico is a Heinemann-Raintree author.

I purchased this book for my 2 year old daughter. She is obsessed with Narwhals and I figured she would enjoy looking at the pictures. When she opened this book on Christmas morning she fell in love. She will not put the book down. The pictures are big and beautiful. Other family members have also enjoyed the book. Quite a bit of information about Narwhals, where they live, what they do during the day, what they eat, and a labeled body part map are featured in this well written informational book. This would be a great addition to a unit on Narwhals or polar animals.

Appropriate for a more advanced reader in my first grade classroom. Was the only text I could find for him to use for his animal research report.

Excellent

Great book! My 1st grader enjoyed reading it and it was a great resource for her book report.

A thin paperback children's book. I thought it would have more technical information so it was not useful to me. More of a book for very small children that a teacher would read to them.

My son is 6 months old & LOVES this book. Pictures are awesome & informative but mainly at his age it's about the pictures.

My daughter is on a Narwhal jag and was tickled to get this book. She was able to convince her disbelieving friends that Narwhals are real.

This is an interesting book and full of cool tidbits about the narwhal. It is for early readers.
